

## BESS project financing options in Czech 2030

How can a Bess project help a net-zero future? Carbon credits earned from BESS projects can be traded in the market at a favourable price. BESS is considered as a "sunshine industry". Thus, it is important for technology, business, and policy stakeholders to forge a winning partnership to help the global economy leapfrog into a net-zero future. Can Bess projects be bundled together? Independent BESS projects, only supporting renewable energy projects, can be bundled together, and issued as green bonds to potential large investors. Is Bess a good investment? Although risk-taking investors seeking a higher return on their investment in BESS can translate into higher energy tariffs, it is not ideal for large-scale adoption of BESS. Moreover, the capital available with this class of investors is limited compared to this solution's growth potential. Does the Czech Republic need to step up its efforts? The Czech Republic is a net beneficiary of the European budget and is heavily dependent on EU resources to achieve ambitious EU climate objectives. Based on our analysis the Czech Republic needs to step up its efforts to fulfil these obligations. It won't be an easy task; Czech programming documents are outdated and not ambitious enough. How can a Bess adopter generate more revenue? Another evolving model that can create an additional revenue stream for BESS adopters is the trading of green credits by virtue of facilitating clean energy. This is increasingly relevant as more countries are establishing structured and regulated carbon markets in their jurisdictions as per global best practices. Is the adoption of Bess a good idea? Presently, the adoption of BESS is low, and the growth of adoption is less than desired. As per the International Energy Agency (IEA), global BESS capacity was 85 GW at the end of and needs to reach GW by to enable seamless grid-integration of renewable energy, with net-zero emissions scenario as a target. EU approves EUR279m state aid for BESS rollout in The European Commission has given the go-ahead to a scheme in the Czech Republic that will support 1.5GWh of energy storage projects. EC greenlights EUR-279m Czech state aid scheme for BESS The European Commission (EC) has approved the Czech Republic's plan for a EUR-279-million (USD 303.7m) state aid programme that will enable the deployment of at least EU Approves Financial Aids To BESS in Czechia The European Commission (EC) has authorized a EUR279 million (\$303 million) aid scheme to support investment into battery energy storage system (BESS) in Czech Republic towards a net-zero economy. How to finance battery energy storage | World Economic Forum This offers comfort to private financiers to provide capital at a competitive rate. Independent BESS projects, only supporting renewable energy projects, can be bundled What Investors Want to Know: Project-Financed Battery Energy Battery energy storage systems (BESS) store electricity and flexibly dispatch it on the grid. They can stack revenue streams offering arbitrage, capacity and ancillary services Topics for Panel Discussion: Future Perspective of PV and Representative of Czech TSO (CEPS) TBA Topics of the Panel Discussion: - Blackout in Spain and its impact on Future of Energy Industry - Key Drivers of PV and BESS Boom by ? Czech Republic Energy Storage While the goal of EU funds is to support a sustainable low-carbon-emission economy and ensure energy security by utilizing alternative energies, the Czech approach is BESS in Germany and Beyond: Use Cases, BESS Capacity across
