

MW scale storage system tender price in Argentina 2025

How many MW of battery energy storage will be deployed in Buenos Aires? The initiative aims to deploy 500 MW of battery energy storage systems (BESS) in the Greater Buenos Aires Area (GBA), but the submitted capacity has far exceeded expectations--reaching a combined 1,347 MW. Can battery energy storage modernize Argentina's grid? Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program. Why is energy storage important in Argentina? The implementation of storage solutions aims to prevent power outages, improve system efficiency, and ensure a stable electricity supply during high-demand periods. This initiative marks Argentina's first large-scale adoption of energy storage technology. The AlmaGBA Storage tender, for the metropolitan area of Buenos Aires (AMBA), will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month. The AlmaGBA Storage tender, for the metropolitan area of Buenos Aires (AMBA), will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month. The AlmaGBA Storage tender, for the metropolitan area of Buenos Aires (AMBA), will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month. Argentina's Wholesale Electricity Market Administration Company (CAMMESA) has published a contract template to guide participants in the 500 MW battery energy storage system (BESS) tender opened in February. Argentina receives 1.3GW of BESS proposals for first-ever. The Argentinean authorities plan to install the new storage capacity in critical nodes of the metropolitan area of Buenos Aires, with an estimated investment of \$500 million and an execution period of between 12 and 18 months. From pv magazine Latam The Argentine Energy Secretariat, which is part of Argentina's Ministry of Economy, has awarded 667MW of battery energy storage system (BESS) in its first tender under the AlmaGBA scheme. Nearly half of the volume submitted for the tender (1.3GW) has been awarded by the wholesale market operator CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico Sociedad Anónima). Argentina has taken a major step toward modernizing its energy infrastructure with the launch of a 500 MW battery energy storage system (BESS) tender under the AlmaGBA program. Aimed at enhancing grid reliability in the metropolitan area of Buenos Aires (AMBA), this \$500 million initiative marks Argentina's first large-scale adoption of energy storage technology. The Argentinean authorities plan to install the new storage capacity in critical nodes of the metropolitan area of Buenos Aires, with an estimated investment of \$500 million and an execution period of between 12 and 18 months. February 18, Luis Iní Arrarte, Secretary of Energy of Argentina's Ministry of Economy, has launched a global tender for 500 MW of battery energy storage system (BESS) projects in the Metropolitan Area of Buenos Aires' (AMBA) critical nodes. The project's estimated value is \$500 million, with an execution period of 12 to 18 months. Argentina publishes details of 500 MW battery tender. Argentina's Wholesale Electricity Market Administration Company (CAMMESA) has published a contract template to guide participants in the 500 MW battery energy storage system (BESS) tender opened in February. Argentina Receives 1.3GW of BESS Proposals for First-Ever. This national and international open
