

## NMC battery storage tender price in Singapore 2026

How much is the NMC battery market worth in ?The NMC market reached USD 21.9 billion, USD 25.8 billion, and USD 30.5 billion in , and respectively. The nickel manganese cobalt (NMC) battery market has been observing significant growth due to growing demand for efficient batteries from different industrial applications such as EV, ESS and many more. How big is the NMC battery market?The U.S. NMC battery market is projected to exceed USD 35.2 billion by , led by federal and state incentives, stricter emission regulations, and the push for energy grid modernization and renewable energy integration. What is the size of the automotive segment in the NMC battery market? Will NMC batteries drive demand for energy storage?The rapid shift towards green energy from traditional energy system is likely to further drive demand for NMC batteries for energy storage in these grids. For instance, according to the US IEA the global renewable capacity is estimated to grow more than 5500GW during - period. Will Li-ion battery prices fall in ?In May, commodity price reporting agency Fastmarkets said that it expected nickel manganese cobalt (NMC) Li-ion battery pack prices to fall below US\$100/kWh in , and lower-cost lithium iron phosphate (LFP) packs to hit the sub-US\$100 threshold even sooner, by . Which battery chemistry is favored by NMC vs LFP?Owing to the improved heat stability and longer life cycle of batteries NMC batteries are favored significantly. Nickel provides higher performance of batteries but are costlier when compared to LFP. Thus, companies or researchers are developing new chemistries to target cost-sensitive users. For instance, nickel zinc (NiZn) battery chemistry. Is LFP cheaper than NMC?LFP is now just less than 1/3 (32%) cheaper than NMC. Another interesting aspect of the changing dynamic from to 's edition of the BNEF survey is that although LFP is a lower cost cathode chemistry than NMC, the portion of lithium carbonate used in its production is much higher than it is in NMC.
