

## average ESS container price per 5MW in Turkey

In February, it said that the prices paid by US buyers of a 20-foot DC container from China in would fall 18% to US\$148 per kWh, down from US\$180 per kWh in . That trend will reverse in the next few years, with small increases in price from onwards. Prices are expected to increase

The price of shipping containers in Turkey varies depending on the type, size, and condition of the container. Generally, new containers cost more than used ones, and larger containers are more expensive than smaller ones. Here are some examples of container prices in Turkey: It's worth noting that As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices According to BloombergNEF's recently published Energy Storage System Cost Survey , the prices of turnkey energy storage systems fell 40% year-on-year from to a global average of US\$165/kWh. The research firm said this was the highest annual drop since its survey launched in . Multiple As of recent data, the average cost of a BESS is approximately \$400-\$600 per kWh. Here's a simple breakdown: This estimation shows that while the battery itself is a significant cost, the other components collectively add up, making the total price tag substantial.
