- Power Conversion Many battery systems on the market are designed to store excess solar energy and reduce your dependency on the grid, but not to act as emergency power sources during an outage. If having electricity during a power cut is important to you, it's essential to choose a system with a backup function. It includes a hybrid inverter that has the possibility to add batteries and these are stackable from 6.4kW up to an incredible 56kW. This systems switches to backup power in less than 10ms which means you dont even notice that the power is gone. It can work as well in island mode so you would have
