

average domestic energy storage price per 2MW in Belgium

Why are energy imports booming in Belgium? Imports from France, the Netherlands, the UK, and Germany have surged recently. This cross-border trade is integral to meeting Belgium's electricity demand and managing price volatility. Expect import dependence to continue as the renewable buildout ramps up and nuclear availability changes.

2. Renewables on the Rise How renewables are affecting Belgium's power supply? Renewables--especially wind and solar--are rapidly increasing their share of Belgium's power supply. In 2023, wind and solar accounted for roughly one-third of the electricity mix, a significant jump from the previous decade. Offshore wind in the North Sea is a particular success story, with Belgium now among Europe's leaders in offshore capacity. When will regasification be completed in Belgium? Phase 1 which aimed at adding 4.7 Mt/year (6.35 bcm/year) of regasification was completed in early 2023. A second phase of 1.3 Mt/year (1.75 bcm/year) is under construction and scheduled by 2025. The Belgium energy market report provides expert analysis of the energy market situation in Belgium. Who is the largest gas supplier in Belgium? Electrabel (100% Engie Belgium) is the largest gas supplier with a market share of 41% in 2023 (58 TWh). Luminus is the second largest supplier, with a market share of 11% in 2023 (17 TWh). Since 2022, all the gas consumed is imported (14.1 bcm in 2023). In 2023, almost half of the gas was imported as LNG. Does Elia publish balancing energy products in Belgium? Elia publishes available volumes and prices for each of the balancing energy products at its disposal in Belgium. The available volumes and prices published here are based on bids and nominations both day-ahead and intraday submitted by BRPs and BSPs in Belgium, taking into account the known technical and contractual constraints. Which suppliers in Belgium have a dynamic plan? The largest supplier in Belgium, Engie was one of the first to market with a dynamic plan. It offers hourly prices plus an app to help you plan usage around low-price periods. EDF Luminus runs a dynamic contract pegged to the wholesale market. The available volumes and prices published here are based on bids and nominations both day-ahead and intraday submitted by BRPs and BSPs in Belgium, taking into account the known technical and contractual constraints. The available volumes and prices published here are based on bids and nominations both day-ahead and intraday submitted by BRPs and BSPs in Belgium, taking into account the known technical and contractual constraints. Elia publishes available volumes and prices for each of the balancing energy products at its disposal in Belgium.
