

## average household energy storage price per 250MW in Ghana

How much energy is needed in Ghana? Around \$70 billion of cumulative energy supply investment is needed in the STEPS, 60% of which is for upstream oil and gas. Investment ramps up by nearly 45% in the AC, with a strong emphasis on renewables and electricity networks. Thanks to notable efforts on electrification, the goal of full access is within grasp in Ghana. Is Ghana a good place to get electricity? Thanks to strong government leadership since the 1990s, Ghana had an electricity access rate of 84% in , one of the highest in sub-Saharan Africa. To reach the remaining population, grid densification (58% of the new connections) and stand-alone systems (27%) are the two main least-cost solutions in both scenarios. Does Ghana still need electricity in ? In the AC, 16 million people who still lack access to electricity in under the STEPS gain access through LPG, biogas or improved cookstoves. Ghana remains a relatively minor producer of oil and gas in Africa. Gas demand grows strongly in the AC, lowering oil use in the power and industry sectors; this increases the need for imports of gas. Is Ghana a good producer of oil & gas? Ghana remains a relatively minor producer of oil and gas in Africa. Gas demand grows strongly in the AC, lowering oil use in the power and industry sectors; this increases the need for imports of gas. Around \$70 billion of cumulative energy supply investment is needed in the STEPS, 60% of which is for upstream oil and gas. Is full access possible in Ghana? Thanks to notable efforts on electrification, the goal of full access is within grasp in Ghana. A mix of grid extension and stand-alone solutions would be the least-cost way to reach the decreasing share of the population that remains without access.
