These inverters combine a solar inverter, charger and battery inverter together with software which can be programmed to determine the most efficient use of your available energy in Gauteng. Is Zambia's Electricity problem worsening over time? In fact, many believe the situation has worsened over time. Presently, the average Zambian home does not get more than six hours of electricity from the DISCOs on a daily basis. It is this appalling situation that has led many Zambians to seek alternatives to what is supplied by the national grid. What is a solar inverter? As stated earlier, a solar Inverter consists of a number of solar panels, electrical cable, batteries and the inverter compartment. The panels are often overlaid on the roof of the house for easy access to sun rays. What are the different types of solar inverters? There are three main types of solar inverters that you should know about. Stand-alone Inverters - these ones are used in isolation. Here, the inverter gets its power from batteries which are in turn charged by photovoltaic rays. How do solar inverters work? Usually, solar inverters are powered by heavy-duty batteries (usually the types used to power trucks), charged by solar energy. But this powering up usually begins from the panels that receive the solar energy from the sun. They now convert and transfer such energy into a form that can be received by batteries.
