

## average lithium ion storage price per 5MW in Chile

Is lithium ion battery storage available in Chile? While many projects are under development, lithium-ion battery storage is still limited. According to data from Acera, the Chilean Renewable Energy Association, there are only 64MW of battery storage capacity currently active, representing 0.2% of national capacity. Is lithium a critical energy resource in Chile? The global and regional significance of lithium as a critical energy resource is examined. The evolution of Chile's lithium industry is analyzed, emphasizing two recent key policy initiatives: the National Lithium Commission report and the newly launched national lithium strategy. The salient features of these initiatives are outlined. What are battery cost projections for 4-hour lithium-ion systems? Battery cost projections for 4-hour lithium-ion systems, with values normalized relative to . The high, mid, and low cost projections developed in this work are shown as bolded lines. Figure ES-2. Why is Atacama a good place to buy lithium? Furthermore, in terms of cost advantages, the production expenses for lithium in Atacama are the lowest worldwide due to favorable evaporation conditions resulting from the region's climate and the existing infrastructure facilitated by the presence of major copper mining operations nearby.

### 3.3. National Lithium Commission

Where are lithium reserves located in the world? The second relates to a fundamental geopolitical factor: the largest lithium reserves globally are located in three neighboring countries of the southern cone: Argentina, Bolivia, and Chile, the so-called "ABC triangle of lithium". These two aspects transform lithium into a material of strategic importance for the region. What is a Lithium Technology Center? This center is a research initiative focused on technological innovation for the entire value chain of lithium batteries.

56 Another Chilean center focused on developing lithium technologies is the Advanced Mining Technology Center (AMTC), located at the University of Chile.
