2. JITA How to choose a lithium battery? Currently, LiFePO₄ prismatic cells constitute 80% of the total lithium battery cost. Use the following four steps to help you choose your lithium battery:

1. The Capacity Capacity is expressed in Ah. 100Ah means that your battery can provide a current of 100 Amps for one hour at a minimum voltage of 12V. How long does a lithium battery last? This is your battery's durability. The most modern lithium battery models can reach up to exceed 5,000 charges/discharge cycles with a 10 years life duration. Note to our readers: These prices were pulled from the respective manufacturers' websites on and consider on-going sales prices. Prices on our Amazon links continuously fluctuate. What makes a lithium battery a good battery? The quality of their material and manufacturing process affects their durability (number of cycles), robustness, and fast charge/discharge abilities. Four prismatic lithium cells are connected in series resulting in a 12V lithium battery pack (4 x 3.2V = 12.8V). Currently, LiFePO₄ prismatic cells constitute 80% of the total lithium battery cost. Which battery is best for solar energy storage? Lithium batteries are the most versatile electricity storage available. They are: Lightweight. Offer great energy density (3-4 times higher than lead-acid). Powerful (up to 2.4kW). Perfectly fitted for solar energy storage. Long-lasting (up to 10 years).
