What is the Oman electricity market annual report ?PROCUREMENT CO. (SAOC) The Oman Electricity Market Annual Report is intended to provide an overview of the Oman Electricity Market (Market) activities and performance during the year (Market Annual Report). It does not form part of the Market Rules, nor does it create any rights or obligations related to the Market Rules. Is Oman electricity market liable?As such, Oman Electricity Market assumes no responsibility or liability for any consequences, financial or otherwise, from matters where information in this report may be relied upon. The Market Data and results can be obtained from the MO website and the Market Management System. What is the Oman electricity market audit?The Market Audit assesses the implementation of the Market Rules. The Oman Power and Water Procurement Company (PWP) has engaged Robinson Bowmaker Paul (RBP) to conduct the Market Audit of the Oman Electricity Market in accordance with Section C of the Market Rules for the Audit Year from 1 January to 31 December . What are the production facilities in the Oman electricity market?All production facilities in the Oman Electricity Market are conventional gas fired plants (OCGT and CCGT) except for IBRI2 Solar and MANAH2 Solar. The Generation share represents the Market Schedule Quantities and not the actual power units generation. In , ALRUSAIL1, MANAH2, and MANAH are new registered power generation facilities. What is Oman's power sector?Oman's power sector is structured around the single buyer model. Oman Power and Water Procurement (OPWP) is the sole purchaser of power and plays a central role in the sector. In Oman plans to launch an electricity spot market, the first in the GCC. The spot market will allow generators without a PPA to sell electricity to OPWP. Why is the electricity spot market important in Oman?The electricity spot market remains a crucial component in Oman's transition to a wholesale electricity market. The development of the electricity spot market aims to achieve multiple objectives within the sector. Over the course of its development and operation, the following benefits have been observed: Oman Electricity Market Annual Report This year Average SMP is higher than by 8.3% due to increase in Pool Demand, non-availability of most efficient power units, Economic Gas Price and other non-fuel cost Statement of Charges Cost Reflective Tariffs Transmission use of system charge is a demand charge based on customers' contribution to the transmission network's average system peak also known as Maximum Transmission System Oman Energy Market Report | Energy Market Research in OmanThe Oman energy market data since and up to is included in the Excel file accompanying the Oman country report.
