What is a solar resource database? It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.

What data formats are provided by Solargis? Provided data layers are in a geographic spatial reference (EPSG:). Metadata is provided in PDF and XML format for each data layer in a download file (according to ISO 19115:/19139). Please visit our FAQ section for more information about GIS data. For other data formats, resolution or time aggregation, visit Solargis website.
