

## average utility scale ESS price per 10kWh in Dominican

How much does electricity cost in Dominican Republic? Dominican Republic, June : The price of electricity is 0.116 U.S. Dollar per kWh for households and 0.172 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes. How much does an ESS system cost? Increased competition in the commercial ESS space Government incentives (e.g., tax credits in the U.S. and Europe) make systems more affordable. For example, in , a 100 kWh system could cost \$45,000. By , similar systems could sell for less than \$30,000, depending on configuration. How much does electricity cost per kWh? For comparison, the average price of electricity in the world for that period is 0.155 U.S. Dollar per kWh for households and 0.152 U.S. Dollar for businesses. We calculate several data points at various levels of electricity consumption for both households and businesses but on the chart we show only two data points. How much does a 100 kWh solar system cost? For example, in , a 100 kWh system could cost \$45,000. By , similar systems could sell for less than \$30,000, depending on configuration. Why invest now? The residential electricity price in Dominican Republic is DOP 6.809 per kWh or USD 0.108. The electricity price for businesses is DOP 10.130 kWh or USD 0.160. These retail prices were collected in December and include the cost of power, distribution and transmission, and all The residential electricity price in Dominican Republic is DOP 6.809 per kWh or USD 0.108. The electricity price for businesses is DOP 10.130 kWh or USD 0.160. These retail prices were collected in December and include the cost of power, distribution and transmission, and all The residential electricity price in Dominican Republic is DOP 6.809 per kWh or USD 0.108. The electricity price for businesses is DOP 10.130 kWh or USD 0.160. These retail prices were collected in December and include the cost of power, distribution and transmission, and all taxes and fees. Figure 2 (BNEF 2020b; Lazard ) shows the average per-kWh retail tariff for electricity for C& I customers in the Dominican Republic. These prices are compared to the unsubsidized Dominican, off-site, utility-scale solar energy LCOE,ii as well as the global average LCOE for on-site C& I solar The rates of Consorcio Energ&#233;tico Punta Cana - Macao, S.A (CEPM) and Compa&#241;&#237;a de Electricidad de Bayahibe (CEB) are established in accordance with the criteria of regulatory agencies and taking into account international fuel indicators, inflation, and the dollar rate in our country. According to the Performance Report of State Electricity Companies of the Ministry of Energy, the average price of purchase and sale of electric energy increased 29.4% and 11.4%, respectively, in January of compared to the same month of the previous year. The document, published last March 17 The average electricity price in the Dominican Republic has dropped from 124.01 USD/MWh in to 121.68 USD/MWh in . Since , the average electricity price in the Dominican Republic has fluctuated between 119.36 USD/MWh ( ) and 167.82 USD/MWh ( ). The top amount of capacity installed In Germany, residential ESS installations now cost \$800-\$1,200/kWh - 34% cheaper than prices. Understanding energy storage system costs requires analyzing three pillars: China's CATL recently achieved \$97/kWh for LFP battery packs - a game-changer for commercial ESS pricing. But how does this Assessment of the Dominican Republic s Commercial and Throughout

## average utility scale ESS price per 10kWh in Dominican

the research for this report, NREL used publicly available data provided by the Dominican government, as well as information shared by private Dominican companies. Electricity rate Electricity Rate The rates of Consorcio Energético Punta Cana - Macao, S.A (CEPM) and Compañía de Electricidad de Bayahibe (CEB) are established in accordance with the criteria of regulatory agencies and taking into account Prices for the purchase and sale of electric power The average purchase price was 15.19 cents per kilowatt-hour (kWh), for an increase of US\$3.45, representing a variation of 29.4%. This is the cost at which the Energy Storage System Price Trends and Cost-Saving Solutions While the global average ESS price per kWh sits at \$465, regional disparities remain stark. The US market sees \$550-\$650/kWh for residential systems due to import tariffs, whereas DRAFT DR NEM Analysis 2021\_UNPUBLISHED In this report, we analyze the economic metrics of net metering in the Dominican Republic and compare that against net billing and total sales for a generic Dominican electric customer. Utility-Scale Battery Storage | Electricity | | ATB | NREL Projected Utility-Scale BESS Costs: Future cost projections for utility-scale BESSs are based on a synthesis of cost projections for 4-hour-duration systems as described by (Cole and Karmakar, What Is ESS Battery Cost Per kWh? ESS battery costs per kWh vary significantly based on system configuration, chemistry, and scale. As of mid-, lithium iron phosphate (LFP) battery cells for energy Utility-Scale Renewables: An Analysis of Pricing Our analysis indicates that power purchase agreement (PPA) prices are not expected to decrease significantly in the foreseeable future. PPA tailwinds include record-low solar module prices and a more favorable interest Solar Photovoltaic System Cost Benchmarks Download the PVSCM Excel Program and Cost Data (Zip file) Utility-Scale PV System (UPV) Figure 1 presents the UPV benchmark system cost components by cost category for both MSP and MMP, without ESS. These values represent What goes up must come down: A review of BESS These capital investments have a meaningful impact and can lower DC container production costs by more than US\$10/kWh. Technology advancement in the ESS sector will also contribute to a steady downward price Volta's Battery Report: Falling costs drive battery Energy storage costs are not forgotten in the report either. Citing BloombergNEF data, cost per kWh have fallen to \$165/kWh in , down 40% from , and half of the \$375/kWh with data on the ongoing falls in costs
