

Will Vietnam develop a battery energy storage system? Vietnam is set to explore the feasibility of battery energy storage systems ("BESS") and formulate policies to support BESS services. In addition, between and , investments will be made in pilot BESS projects for specific solar farms, including a 50MW and a 400MW solar farm. What will Vietnam do with electric buses in ? Transportation services Vietnam will deploy electric bus systems by and develop public infrastructure for electric vehicles and other environmentally friendly means of transport in urban areas and an electric vehicle charging network by . Projects eligible for JETP funding

What is the current status of Vietnam's power system? (i) Current status of Vietnam's power system with high RE (solar and wind power) rate, and the capacity of RE projects is greatly fluctuated. (ii) Advantages and disadvantages of operating a power system with a high RE rate. (iii) Demand and necessity of electricity storage in the current and future power system of Vietnam. Is energy storage system a good investment? According to international energy experts, when RE electricity rate reaches 15% up, the investment in energy storage system is economically efficient. So, in many countries over the world, the energy storage systems have become the necessary technologies in demand side management, RE and smart grid development. How will Bess projects work in & ? In addition, between and , investments will be made in pilot BESS projects for specific solar farms, including a 50MW and a 400MW solar farm. The investment capital will be from the IPG members, other development financial institutions, and Vietnam's commercial banks. Offshore Wind Power

What are the main sources of energy in Vietnam? Northern Vietnam's energy landscape predominantly relies on two sources: hydropower (43%) and coal (48%). The prolonged drought depleted hydropower reservoirs, leading to the shutdown of 11 hydropower plants, removing 5,000MW from the grid. Vietnam Large Scale Energy Storage Market Several influencing factors are shaping the evolution of the Vietnam Large Scale Energy Storage Market, including regulatory frameworks, grid infrastructure limitations, and Development of Battery Energy Storage Systems in Vietnam

A common revenue model for a BESS project is to secure income through long term arrangements - such as a tolling agreement, capacity market contracts or ancillary service Vietnam financing Vietnam project 50 at the latest. These goals will help drive a shift towards project financing for renewable energy projects, particularly in a post-FiT Vietnam, given the direct link between cost-efficient financing Vietnam released list of energy projects eligible for Vietnam is set to explore the feasibility of battery energy storage systems ("BESS") and formulate policies to support BESS services. In addition, between and , investments will be made in pilot BESS projects for specific solar farms, Battery Energy Storage Systems in the Commercial and Companies can then choose to finance projects using their own funds or explore leasing and other financing options. PDP provides cost-free advice to local companies and connects them ADB supports Vietnam in developing energy storage systems to Alongside Mongolia and Cambodia, Vietnam will receive technical and financial support to promote energy storage solutions - a key factor in transitioning to a low-carbon CNESA Global Energy Storage Market Tour - Vietnam The two sides conducted a systematic discussion on the development plan

for energy storage and clean energy in Vietnam, focusing on topics such as policy support ADB, EVN discuss investment in \$30 mln battery Two business models were proposed for the project: Ancillary Services Contract and Grid Asset. Potential ancillary services include power consumption and frequency control, which are increasingly important in the The Project Financing Outlook for Global Energy Projects See The IRA at a Year and a Half: IRS Guidance and Impact on the Energy Storage Industry. While lenders may need to undertake additional diligence before financing an energy storage project, the project finance Vietnam Large Scale Energy Storage Market Several influencing factors are shaping the evolution of the Vietnam Large Scale Energy Storage Market, including regulatory frameworks, grid infrastructure limitations, and External Financing for Energy Projects The questions below are geared toward existing building upgrades. If it is a new construction project there may be more financing options, as well as the ability to combine financing ACEN and AMI Renewables develop Vietnam's first The joint venture is collaborating with Honeywell to integrate Vietnam's first grid-connected battery energy storage system (BESS) project in the 50 MWp Khanh Hoa Solar plant The project aims to demonstrate the commercial viability, What financing options are available for commercial and industrial Financing options for commercial and industrial energy storage projects are varied and designed to cater to different business needs. Here are some key options: Energy Storage Financing: Advancing Contracting in Energy Energy Storage Financing The Energy Storage Financing study series is an outreach effort to the financial industry to help reduce and mitigate the risk of investing in energy storage Program Overview Title 17 Clean Energy Financing State Energy Financing Institution (SEFI) Projects () SEFI projects support deployment of a qualifying clean energy technology and receive meaningful financial support or credit Project Finance - Vietnam 18. What types of funding structures (e.g. debt, equity or alternative financing) are typical for project financing in your jurisdiction. For example, are project bond issuances,
