

How many solar facilities will Hungary have in 2026? In another tender, for a wider range of companies, contracts are being signed to support the completion of 50 facilities in with HUF 62bn of state contributions. Lantos said Hungary's solar energy capacity has surpassed 7.5 GW. Will Hungary support the installation of new electricity storage facilities? Hungary notified to the Commission, under the Temporary Crisis and Transition Framework, a Hungarian scheme to support the installation of at least 800 MW/ MWh of new electricity storage facilities. Will Hungarian electricity storage facilities support a net-zero economy? The European Commission has approved a EUR1.1 billion (approximately HUF 436 billion) Hungarian scheme to support electricity storage facilities to foster the transition to a net-zero economy. What is the largest solar project in Hungary? The Hungarian Electricity Works (MVM) energy group constructed it, funding 65% of it and utilizing EU subsidies to cover the remainder. Like Kapuvár Solar Park, Paks Solar Park took the title of the largest solar project in Hungary during its establishment in 2013. Annually it is capable of providing electricity for roughly 8,500 homes. How will a EUR1.1 billion Hungarian measure affect electricity storage capacity? This EUR1.1 billion Hungarian measure will facilitate the development of electricity storage capacity. The Hungarian electricity system will be more flexible. The preparation for a higher integration of renewables into the electricity mix, is in line with EU climate and energy targets. How many solar plants will Hungary have by 2026? Lantos said Hungary's solar energy capacity has surpassed 7.5 GW. By 2026, they are calculating that there will be 12 GW of solar plants, but additional network investments will be needed to connect this capacity to the grid. Hungary launches new CfD support scheme targeting The new Storage CfD Scheme, together with the accompanying CAPEX scheme is expected deliver a much-needed boost to investments in new electricity storage units on the Hungarian market. Financing Options for Solar Power Capacity in Hungary* Simple, standardised "plain vanilla" solar project loans could improve the predictability and planning of financing, thus speeding up the project preparation phase, especially for medium- Gov't to Offer New Subsidies for Energy Storage - Minister According to news wire MTI, Lantos said through currently running applications, families and businesses are being supported by HUF 260 bln of funding for investments into Hungary launches new support scheme for renewable and Beyond the required development of storage solutions, applicants can also use the grant to set up or expand renewable energy generation systems, including solar panels, State aid: Commission approves EUR1.1 billion Hungarian All storage technologies will be eligible. The storage projects to be supported under the scheme will be selected through a competitive bidding process. The award of the grant contracts to the Hungarian storage tender Storage tenders 2 storage tender rounds planned: 1st round: Q3 (tender call to be published soon) 2nd round: Q2 Projects to be completed until - (in 36 months), if not met, Atlas Renewable Energy - Powered by Excellence Atlas Renewable Energy Closes Largest Financing Deal in Company History for Hybrid Solar-Storage Project Working with top international and national banks, the company Project Financing and Energy Storage: Risks and While lenders may need to undertake additional diligence before financing an energy storage

project, the project finance market for energy storage has grown, and is expected to continue to grow, alongside the rapid expansion. From innovative financing models to large-scale project development, the conversations we will have over two days of the event will shape the trajectory of solar investment and deployment for years to come. This year's agenda:

- CATL announces its second European battery plant in Debrecen, Hungary. On August 12, Contemporary Amperex Technology Co., Limited (CATL) officially announced it will invest 7.34 billion euros to build a 100 GWh battery plant in Debrecen, Hungary, which is also its second battery plant in Europe.
- European Market Outlook for Battery Storage - The European Market Outlook for Battery Storage - analyses the state of battery energy storage systems (BESS) across Europe, based on data up to and including CATL's announcement.
- CATL to Establish Fourth Battery Factory in Europe. This will be CATL's fourth battery factory in Europe. It is understood that the first factory in Germany has a planned capacity of 14GWh. The factory in Hungary, with a planned annual capacity of up to 100GWh, is Green Genius secures US\$75 million for solar-plus-storage. Green Genius has secured EUR64 million (US\$75 million) in finance to support the development of a solar-plus-storage portfolio in Lithuania.
- Battery storage tax credit opportunities and Structuring options for financing energy storage: Sale-leaseback Structuring options for financing energy storage: Pass-through lease. There are other structuring variations of the lease pass-through. Tax credits for CATL eyes USD 4bn in Hong Kong listing to fund Hungary factory. The company plans to use most of the net proceeds, expected to be about HKD 30.7 billion, to advance the construction of Phase I and II of its Hungary project, according to Verano Energy secures USD 204 Million Project Finance facility to Verano Energy has successfully closed financing for its Domeyko Solar + Battery Energy Storage System (BESS) project, an 83 MWp solar plant with 660 MWh of
