Are battery electricity storage systems a good investment? This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. By 2025, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better combinations and reduced use of materials. Are battery storage projects financially viable? Different countries have various schemes, like feed-in tariffs or grants, which can significantly impact the financial viability of battery storage projects. Market trends indicate a continuing decrease in the cost of battery storage, making it an increasingly viable option for both grid and off-grid applications. How do government incentives and subsidies affect battery storage? Government incentives and subsidies play a significant role in the economics of battery storage. In the United States, the investment tax credit (ITC), which offers a tax credit for solar energy systems, has been extended to include battery storage when installed in conjunction with solar panels. Will lithium-ion batteries become more expensive in 2025? According to some projections, by 2025, the cost of lithium-ion batteries could decrease by an additional 30-40%, driven by technological advancements and increased production. This trend is expected to open up new markets and applications for battery storage, further driving economic viability. How will lithium-ion batteries impact the future? Battery lifetimes and performance will also keep improving, helping to reduce the cost of services delivered. Lithium-ion battery costs for stationary applications could fall to below USD 200 per kilowatt-hour by 2025 for installed systems. How has the cost of battery storage changed over the past decade? The cost of battery storage systems has been declining significantly over the past decade. By the beginning of 2020, the price of lithium-ion batteries, which are widely used in energy storage, had fallen by about 89% since 2010.
