

# government procurement price of PV energy storage in Norway

Is solar PV a good option for the future Norwegian power market? Solar PV has an average market value as low as 20 &#177; 3 EUR/MWh. Despite low LCOE estimates, solar PV does not look like an attractive option for the future Norwegian power market, given our model assumptions. What is the public procurement law in Norway? 1. Overview In Norway, the public procurement legislation is set out in one general framework law and various corresponding regulations. The general framework law (the Public Procurement Act) applies to all public contracts (above NOK100,000), and sets out the general procurement principles. Will fossil fuel costs affect electricity prices in Norway in ? Electricity prices remain strongly affected by fossil fuel costs to . The power price in Norway is modelled to be 39 &#177; 4 EUR/MWh. Market value of Norwegian hydropower is 34% higher than the average power price. Seasonal patterns for solar PV give &lt;3% probability of revenues higher than the LCOE. Will Norwegian power prices remain moderate in the future? The finding in this study suggests that Norwegian power prices are likely to remain moderate and that summer price will be relatively low in the future North European power market. Onshore wind is more likely to exceed its LCOE - its market value exceeded the mean LCOE in 50% of the simulations. How much electricity does Norway produce in ? In , Norway had an electricity production of 157 TWh, of which 91% was from hydropower, 8% from onshore wind, and &lt;1% from thermal sources (NVE, 2021b). This shows that the Norwegian generation mix is already dominated by renewable energy. In normal weather years, Norway exports around 19 TWh of electricity to neighbouring countries. What is the power price in Norway in ? The power price in Norway is modelled to be 39 &#177; 4 EUR/MWh. Market value of Norwegian hydropower is 34% higher than the average power price. Seasonal patterns for solar PV give &lt;3% probability of revenues higher than the LCOE. On/offshore wind has a 50%/1% probability of having revenues higher than the LCOE. Turnkey price: Price of an installed PV system excluding VAT/TVA/sales taxes, operation and maintenance costs but including installation costs. For an off-grid PV system, the prices associated with storage battery maintenance/replacement are excluded. Turnkey price: Price of an installed PV system excluding VAT/TVA/sales taxes, operation and maintenance costs but including installation costs. For an off-grid PV system, the prices associated with storage battery maintenance/replacement are excluded. The International Energy Agency (IEA), founded in November , is an autonomous body within the framework of the Organisation for Economic Co-operation and Development (OECD) which carries out a comprehensive programme of energy co-operation among its 23 member countries. The European Commission SUSOLTECH joins universities, research institutes and industry, and is funded by industry and the Research Council of Norway. The report is based on interview and survey data. We would like to thank the participants that devoted precious time and provided valuable insights. We also appreciate The new provisions will allow PV systems up to 5 MW in size to sell power and share surplus energy within specific industrial areas. Norway's Ministry of Energy is defining regulatory changes to enable surplus renewable power from plants up to 5 MW to be shared within industrial areas. Energy Substantial parts of the Public Procurement Act and

## government procurement price of PV energy storage in Norway

the regulations are based on EU/EEA directives and aim to ensure fair competition and transparency in the procurement process. The different regulations share many common features and are based on the same principles, but they also have some differences; will continue to improve access to statistics and data on green and innovative public procurement 3.6. Differences; and LUP develops their role to facilitate increased collaboration between contracting authorities - to develop and adopt environmental technology and circular economy solutions 3.7. Program The Energy Commission has been led by Professor Lars Skjold, the former Director General of the Norwegian Competition Authority with the main tasks to assess challenges in of the Norwegian energy policy towards and , including how different policy choices affect the long-term development National Survey Report of PV Power Applications in Norway Turnkey price: Price of an installed PV system excluding VAT/TVA/sales taxes, operation and maintenance costs but including installation costs. For an off-grid PV system, the prices Long term power prices and renewable energy market values in This study presents an analysis of different risk factors for future power prices and renewable energy market values in Norway, a region dominated by renewable power. The Norwegian solar energy innovation system While the fall in PV prices has increased viability also in competition with fossil energy sources, high capital costs are seen as a significant barrier to more rapid diffusion, particularly given the Norway defining new rules for energy communities - The new provisions will allow PV systems up to 5 MW in size to sell power and share surplus energy within specific industrial areas. Public Procurement In this practice guide, unless otherwise specified, we will focus on the Procurement Regulation ("classic sector") and its Part III. This is the regulation mostly applied in Norway and Part III covers the procurements of contracts Norway's Action Plan to Increase the Proportion of Green The Norwegian government has opened and simplified the procurement legislation to make life easier for green contracting authorities. But in the end, it is up to contracting authorities to The Norwegian Energy Commission's report Energy requirements in technical standards: Tightening of the energy requirements for new buildings in building technical regulations to provide incentives to use Norway Renewable Energy bids and eProcurementView Renewable Energy government contracts and RFPs from Norway.
