

# government procurement price of commercial energy storage in Philippines

The ERC pegged the preliminary Green Energy Auction Reserve (GEAR) prices at PHP 4. per kilowatt-hour (kWh) for rooftop solar, PHP 4. for ground-mounted solar, PHP 5. for floating solar, PHP 6. for onshore wind, and PHP 5. for solar with Battery Energy Storage System (BESS). The Energy Regulatory Commission (ERC) has released draft reserve prices for the fourth round of the Green Energy Auction Program (GEAP), marking the first time that solar-plus-storage projects will be included. The ERC pegged the preliminary Green Energy Auction Reserve (GEAR) prices at PHP 4. The Philippines' Department of Energy (DoE) has increased the installation target for pumped hydro storage from 4,000 MW to 4,250 MW as part of the third round of the country's Green Energy Auction (GEA-3). In a notice issued on December 24, 2023, the DoE said that this increase in installation target will be implemented in the fourth round of the auction. The Department of Energy (DOE) has officially released the Terms of Reference (TOR) for the fourth round of the Green Energy Auction (GEA-4), providing a clear framework for the auction process. The TOR sets out the technical, financial, and commercial requirements that will govern project development. The Philippines Department of Energy (DOE) has started an auction scheme for renewable power paired with storage which aims to tender over 9GW of capacity. The DOE officially released the Terms of Reference (TOR) on 13 March for the competitive solicitation, which will be held as part of the fourth round of the Green Energy Auction (GEA-4). The Philippines Department of Energy (DOE) has launched a tender that will facilitate the integration of more than 9 GW of new renewable power generation capacity, some of which to be paired with battery energy storage. The government released the Terms of Reference (TOR) for solicitation, to be held in Manila, Philippines. -- The government is reinforcing the country's power supply with the launch of the fourth green energy auction (GEA-4), offering 10,478 megawatts (MW) of renewables and storage capacities. Under the terms of reference (TOR) issued yesterday, the Department of Energy (DOE) is set to release draft reserve prices for the fourth round of the Green Energy Auction Program (GEAP), marking the first time that solar-plus-storage projects will be included. Both projects eligible for feed-in tariffs and those which are not, including pumped hydro storage, under the GEA-3 will be awarded 20-year supply contracts starting from the commercial operation date. Philippines opens Green Energy Auction 4, integrating energy storage. The registration of qualified suppliers for GEA-4 will commence one (1) working day after the Energy Regulatory Commission (ERC) publishes the Green Energy Auction Program (GEAP) Terms of Reference (TOR). Philippines kicks off 9.4-GW renewables-storage tender. The Philippines Department of Energy (DOE) has launched a tender that will facilitate the integration of more than 9 GW of new renewable power generation capacity, some of which to be paired with battery energy storage. Government offers over 10,400 MW for 4th green energy auction, offering 10,478 megawatts of renewables and storage capacities. Energy Storage System in the Philippine Electric Power Industry. The passage of Republic Act No. 11234, entitled "Energy Virtual One-Stop Shop (EVOSS) Act" on 08 March paved the way for streamlining and expediting the permitting process. Philippines renewables auction awards 9.4 GW, short of 10.6 GW target.
