

government procurement price of wall mounted battery in New Zealand

How much does government procurement cost in New Zealand? New Zealand's government procurement, valued at roughly \$40 billion NZD annually, opens doors for businesses of all sizes. The centralized platform, Government Electronic Tenders Service (GETS), publishes opportunities and categorizes them as low-value (under \$50,000 NZD), medium-value (\$50,000-\$250,000 NZD), and high-value (over \$250,000 NZD). What if the funding requirements for the NZ battery investment are too high? If the funding requirements for the NZ Battery investment are much greater than anticipated, there may be increased cost burdens for the Crown or electricity consumers. The Indicative Business Case is informed by the current best available cost information, but this will continue to be updated as improved design information becomes available. How many technology options are there in the NZ battery project? A longlist of 28 different technology options was identified early in the NZ Battery Project by the NZ Battery Project team and MBIE Energy Markets policy team. The list was peer reviewed by the NZ Battery Technical Reference Group and Arup Ltd, and further considered by WSP Ltd. What makes a good New Zealand battery project? It is important that the New Zealand Battery project learns from previous mistakes and implements best practice protocols where possible. Governance - The overall purpose of effective governance is to ensure that an organisation's project and change portfolio is aligned to the organisation's objectives, delivered efficiently, and is sustainable. How can the NZ battery project achieve its strategic and investment objectives? Ensure the NZ Battery Project will achieve its strategic and investment objectives. The project will have strong technical and policy directives which may at times be challenging to reconcile. Is the Portfolio option a good option for the NZ battery project? The MCA identifies the Portfolio option as narrowly ahead of Lake Onslow as the option that best meets the competing objectives of the NZ Battery Project. The Portfolio option has a range of positive elements that make it an attractive option in theory.
