

What will the Finnish battery and electrification sector do in 2025? In 2025, the Finnish Battery and Electrification sector will be a forerunner that provides skills, innovation, sustainable economic growth, well-being and new jobs for Finland. The Finnish battery cluster masters responsible production and optimal use of batteries and battery systems. Can Finland become an international actor in the battery and electrification sector? The Battery Strategy outlines the measures that can help Finland become an internationally important actor in the battery and electrification sector. The preparation of the strategy reinforced the perception among the authors that achieving the objective is possible but there is no time to lose. What is Finland's battery strategy? Minister of Economic Affairs Mika Lintilä appointed a working group to prepare the strategy by the end of 2024. The objective for the battery strategy work was to strengthen the Finnish battery ecosystem and boost sustainable, low-carbon economic growth in Finland. Is Ardian building a second battery energy storage system in Finland? Ardian, a world-leading private investment house, in partnership with its operating platform eNordic, today announces it has taken Final Investment Decision to build its second battery energy storage system (BESS) in Finland. This new 30 MW/30MWh BESS project further strengthens Ardian's commitment to advancing energy infrastructure in the Nordics. Can Finland be a leader in sustainable battery manufacturing and recycling? In June 2024, The Ministry of Economic Affairs and Employment of Finland launched work to formulate a national battery strategy that will enable Finland to strengthen its role as a pioneer in sustainable battery manufacturing and recycling. How can Finland play a role in the battery industry? Finland can play an important role in this process, not only through mineral reserves and their processing, but also through innovative production technologies and processes. The key findings of our national battery strategy work can be summarised in three words: skills, responsibility and competitiveness. As part of the economic policy measures introduced by Prime Minister Petteri Orpo's government, Business Finland opened a funding call in January for investment aid targeting large-scale industrial projects aligned with the clean transition. As part of the economic policy measures introduced by Prime Minister Petteri Orpo's government, Business Finland opened a funding call in January for investment aid targeting large-scale industrial projects aligned with the clean transition. As part of the economic policy measures introduced by Prime Minister Petteri Orpo's government, Business Finland opened a funding call in January for investment aid targeting large-scale industrial projects aligned with the clean transition. Now, the first funding decisions have been made, and Ardian, a world-leading private investment house, in partnership with its operating platform eNordic, today announces it has taken Final Investment Decision to build its second battery energy storage system (BESS) in Finland. This new 30 MW/30MWh BESS project further strengthens Ardian's commitment. The working group proposes seven objectives for the strategy period 2024-2028: growth and renewal of the battery and electrification cluster, growth of investments, promotion of competitiveness, increased international awareness of the strategy, responsibility, definition of key roles in the Swedish flexible assets developer and optimizer Ingrid Capacity has joined hands with SEB Nordic

Energy's portfolio company Locus Energy to develop what is claimed to be Finland's largest and one of the Nordics' largest battery energy storage systems (BESS). The 70 MW/140 MWh BESS project will be Business Finland, the government's funding agency, has provided substantial financial backing to strengthen Finland's position in the European battery ecosystem. Most notably, a EUR115 million grant to Easpring Finland New Materials will support CAM factory construction, while an EUR84.6 million grant to Fu-Gen AG has sold a 50 MW ready-to-build battery energy storage project in Finland to Nala Renewables EY Corporate Finance offers investment banking services through dedicated teams with a focus on M& A. EY Corporate Finance leverages EY's global network of investment banking professionals to Investment aid has been granted to five projects As part of the economic policy measures introduced by Prime Minister Petteri Orpo's government, Business Finland opened a funding call in January for investment aid targeting large Ardian Clean Energy Evergreen Fund (ACEEF) Expands Finnish "Our first investment in Finnish battery storage was a significant milestone, and this second project further demonstrates Ardian's commitment to clean energy expansion. National Battery Strategy The Battery Strategy outlines the measures that can help Finland become an internationally important actor in the battery and electrification sector. The preparation of the strategy Finland to host 240 MWh of new BESS projectsThe project proponents have confirmed that the construction works will start in March . The project, which is one of the largest of its kind in Finland, will provide grid services including frequency response and will be (PDF) National Battery Strategy , FinlandThe Battery Strategy outlines the measures that can help Finland to become an internationally important actor in the battery and electrification sector. Finland's Battery Supply Chain Boost: Building EU Materials Most notably, a EUR115 million grant to Easpring Finland New Materials will support CAM factory construction, while an EUR84.6 million grant to Fortum Battery Recycling will enable EY advises Fu-Gen on sale of a 50 MW BESS project Construction is expected to start during Q2 , with operations of the BESS commencing in . Fu-Gen AG is a Swiss-based renewables developer and independent power producer with a strong track The Project Financing Outlook for Global Energy As with all project finance transactions, project companies must show that the project can support a steady and reliable stream of cashflows. Traditionally, energy storage projects have had long-term offtake agreements, Business Finland opens a call for Tax credit for large On 24 March , we will open a call for tax credits for large clean transition investment projects in renewable energy production and energy storage, decarbonization of industrial production processes and improvement of energy
