

# sodium ion battery storage project financing options in Singapore 2030

Could sodium-ion batteries make energy storage systems more cost-effective? PHOTO: BT FILE

THE Energy Market Authority (EMA) has awarded a total of S\$7.8 million to two companies to explore solutions that could make energy storage systems (ESS) more cost-effective and space-saving. One of the research and development (R& D) projects involves the use of sodium-ion batteries by battery manufacturer Posh Electric. How much EMA grant for sodium-ion battery & underground storage research in Singapore? On 23 Oct, Singapore announced S\$7.8M EMA Grant for Sodium-ion Battery and Underground Storage research in Singapore. Image Source: Artist Impression (Image for illustration purposes only) Can a sodium ion battery be a cheaper alternative? Posh Electric to test sodium-ion batteries as cheaper alternative. VFlowTech to study underground energy storage systems. Singapore's push for better energy storage takes a big leap with new grants for innovative solutions. Energy Storage Systems (ESS) are devices that store energy for use later. Can a sodium-ion battery manage electricity demand in Singapore? It could also manage changes in electricity demand by storing electricity during off-peak periods, and releasing it during times of peak demand. The trial will collect fire safety data as part of its evaluation of how sodium-ion batteries perform in the Singapore climate. Such batteries have not yet been deployed in Singapore. Can sodium-ion batteries manage solar intermittency? One of the research and development (R& D) projects involves the use of sodium-ion batteries by battery manufacturer Posh Electric. The company aims to test a 1 megawatt-hour ESS made out of sodium-ion batteries to manage solar intermittency. Can sodium ion batteries help shift electricity demand? The sodium-ion batteries could enable the shift of electricity demand by storing electricity during peak periods and releasing it during times of peak demand. The technology has not yet been deployed in Singapore and the trial will evaluate the performance of batteries in local climate. EMA Awards \$7.8 million to Better Harness Energy The Energy Market Authority (EMA) has awarded grants totalling \$7.8 million to two companies to explore solutions that could enhance the cost-effectiveness and optimise the space required for energy storage systems Posh Electric Secures EMA Grant for Sodium-Ion Battery Project Posh Electric, a fully owned subsidiary of Posh Energy in Singapore, has received funding from the Energy Market Authority (EMA) of Singapore to test an energy S\$7.8M EMA Grant for Sodium-Ion Battery and Underground As stated by EMA, "Sodium is more naturally abundant than lithium, SIBs could potentially be a cheaper alternative to conventional lithium-ion batteries." If successful, this EMA grants \$7.8m to boost energy storage research in Singapore The Energy Market Authority (EMA) has awarded \$7.8m in grants to two companies for research projects aimed at improving the cost-effectiveness and space Posh Electric Awarded EMA Grant for Sodium-ion Battery Project We have, over the years, developed unique battery control hardware and software solutions to manage a wide variety of battery chemistries, including sodium-ion Posh Electric Awarded EMA Grant for Sodium-ion Battery Project SAN FRANCISCO, Aug. 5, /PRNewswire/ -- Posh Energy's fully owned subsidiary in Singapore, Posh Electric ("POSH"), has been awarded a grant from the Energy Market EMA awards \$7.8 mil in grants to two companies The sodium-ion batteries could
