

How many projects have been awarded in Greece's first battery energy storage system? The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents. How much does a Bess plant cost? CAPEX of the BESS plant is of the greatest importance regarding the commercial assessment of the investment. With BESS system prices being high today (with costs for Lithium-Ion BESS ranging from 550.000 EUR/MW to 650.000 EUR/MW for the future). How many MW of Bess will be awarded? In total MW of BESS will receive the support mechanism and the plan is to be awarded with two more phases culminating December. CAPEX of the BESS plant is of the greatest importance regarding the commercial assessment of the investment. How much does a Bess system cost? With BESS system prices being high today (with costs for Lithium-Ion BESS ranging from 550.000 EUR/MW to 650.000 EUR/MW for the future). The augmentation or repower plan strategy to be followed by the investor will greatly influence the commercial assessment both in terms of costs and revenues. How many energy projects did Helleniq & Intra Energy bid for? Helleniq Energy and Intra Energy (Intrakat) are each behind three of these 12 projects, PPC Renewables bid successfully for two projects, while Aenaos (Mytilineos), Energiaki Techniki Anaptyxiaki, Energy Bank, and one energy community bid successfully for one energy storage project each. What is a Bess augmentation strategy? The BESS augmentation strategy can thus play a significant role, especially when the BESS is examined in a competitive environment such as the electricity markets. As soon as a BESS system is completed, it will participate in the DAM and IDM Markets run by HEnEx and BEM Market run by IPTO. The weight average winning bid in this round was EUR46,680/MW/year. Research firm LCP Delta wrote a deep-dive into the dynamics which would play out in the second round for Energy-Storage.news in September. The weight average winning bid in this round was EUR46,680/MW/year. Research firm LCP Delta wrote a deep-dive into the dynamics which would play out in the second round for Energy-Storage.news in September. The Regulatory Authority for Energy (RAE) of Greece revealed the shortlist of successful bidders in the second round of its auction for energy storage, totalling 1.5GW/3.1GWh of projects, last week (8 February). Various Greek and regional European news outlets have in the past 24 hours reported The bids were priced at between EUR 34,000 (USD 37,475) per MW and EUR 64,000 per MW and were capped at EUR 115,000 per MW per year. The lowest offer was launched by Helleniq Energy, while Intra Energy placed the highest bid. The selected developers will receive a grant of up to EUR 200,000 per MW According to EnergyPress, the finalized list stands as follows: Bids in the tender round were priced at between EUR 33,948 per MW and EUR 64,122 per MW, with the weighted average price of the successful proposals standing at EUR 49,748 per MW annually. Bids were capped at EUR 115,000 per MW per Before the end of , Greece intends to provide subsidies for standalone battery projects of 200 MW in total via the third auction. The Ministry of Environment and Energy issued a decree determining the available

successful bid price of containerized BESS project in Greece 2026

operating power quota. Together with the support awarded in the first two auctions a result of the very low operating aid bids that investors submitted during the 1st BESS Tender. Furthermore, the operating aid granted to successful projects, in the form of a feed-in premium, all consider the Project Group Estimated Market Revenues, as was the case in the 1st BESS Tender. The With BESS system prices being high today (with costs for Lithium-Ion BESS ranging from 550.000 EUR/MW to 650.000 EUR/MW for the future. The augmentation or repower plan strategy to be followed by the investor will greatly influence the commercial assessment both in terms of costs and revenues. In Greece: Second round winners in BESS auction The successful participants in the second round of Greece's auction for financial support of large-scale BESS have been revealed. The Regulatory Authority for Energy (RAE) of Greece revealed the shortlist of Seven developers win in Greece's 400-MW BESS The list of winners in Greece's maiden tender for standalone battery energy storage system (BESS) projects includes seven companies with 12 proposals, Energypress reports. Greece disclosed the 7 winners of its first power Bids in the tender round were priced at between EUR 33,948 per MW and EUR 64,122 per MW, with the weighted average price of the successful proposals standing at EUR 49,748 per MW annually. Greece to offer 200 MW in third battery storage auctionThe program is part of the just transition efforts within Greece's coal phaseout, currently scheduled to be completed in . Grants for the capital expenditure or capex for POWER: Greece Awards 188.9MW in Final BESS Auction as The average awarded price in the auction was EUR52,589.16/MW/yr, with bids ranging from EUR43,927/MW by HELLENiQ Renewables to EUR58,773/MW by Plain Solar. Prices have increased The 2 tendering process for the award of investment and BESS projects that successfully participate in the 2nd BESS Tender will receive an investment grant of 100,000.00 EUR/MWh, as well as operating aid regulated by an Operating Aid Agreement BESS Profitability Analysis in Greece Effects such as technology developments and economies of scale are anticipated to reduce BESS future prices, but on the other hand, availability and cost of materials and disruptive events Greece: 27GW of battery storage projects gear up for While the winning projects bid less than EUR60k/MW, most bids sought more than EUR70k with higher prices missing out. While funding was awarded to established Greek companies, notable losers included Eunice and
