

successful bid price of solar with battery project in Greece 2026

How many mw subsidized battery storage in Greece? Home » News » Renewables » Greece awards 188.9 MW for subsidized battery storage in final auction Greece's third energy storage auction has been completed, with nine projects selected and a capacity of 188.9 MW. What is the highest subsidy for a battery project in Greece? The highest awarded subsidy came at EUR58773/MW/year and refers to a 7.9 MW/31.6 MWh project located in the same region. Greek firm Hellenic Renewables, which is a subsidiary of Helleniq Energy, offered the lowest successful bids for two battery projects of 25 MW/100 MWh each. Why is Greece launching a storage auction in ? Funding was first announced in as part of the National Recovery and Resilience Plan. Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. How many battery storage projects are being auctioned this year? The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license. With support for 1GW of battery capacity to be auctioned 3 tranches this year, the results for the first auction of 400MW have been announced with a few winners, but lots of losers. Does Greece have a Bess subsidy program? Moving forward, Greece is abandoning subsidizing BESS via auctions. Instead, the country has recently launched a new program for 4.7 GW of unsubsidized BESS which will be offered priority grid connections on a merchant basis without subsidy support. The investments will benefit from a public grant of EUR 200,000 per MW and they must now submit a letter of guarantee for EUR 35,000 per MW within the next three months. As for the average price, it landed at EUR 52,589.16 per MW per year in the auction. The investments will benefit from a public grant of EUR 200,000 per MW and they must now submit a letter of guarantee for EUR 35,000 per MW within the next three months. As for the average price, it landed at EUR 52,589.16 per MW per year in the auction. The highest bid was submitted by Plain Solar at EUR58,700 per megawatt, while the lowest came from Ecosolar at EUR42,500 per megawatt. The average bid price was lower than that of the first competitive process, which stood at EUR49,748 per megawatt, but higher than last year's second tender, which The average subsidy price in the third auction exercise came at EUR52589.16/MW/year. The lowest successful bid stood at EUR43927/MW/year, concerning a 25 MW/100 MWh project in the Western Macedonia region. The highest awarded subsidy came at EUR58773/MW/year and refers to a 7.9 MW/31.6 MWh project While 12 projects won awards in the first tranche of Greece's recent grid-scale energy storage auctions, what of the c.500 totalling nearly 27GW that didn't? Jon Ferris, LCP Delta's Head of Flexibility and Storage, looks at the dynamics which could play out in rounds two and three in Europe's Greece has launched its third and final tender under a 1-GW program to support standalone battery energy storage systems (BESS), aiming to allocate 200 MW of capacity with available subsidies of EUR 200,000 (USD 217,920) per MWh. This move, approved by Greece's Regulatory Authority for Energy Greece has initiated a tender for 200 MW of battery energy storage systems (BESS) as part of its 1-GW program, aimed at establishing standalone energy

storage capacities. The tender, approved by the Regulatory Authority for Energy, Waste and Water (RAAEY), will close for bids on December 23, . Greece has launched its third tender for battery energy storage capacity, seeking to award 200 MW of projects, which will compete for subsidies of EUR 200,000 (USD 217,920) per MWh. Battery energy storage systems (BESS) License: CC0 1.0 Universal (CC0 1.0) Public Domain Dedication. The auction is The 8 companies that "pass" the tender for 190 MW of standalone The eight companies that have advanced include: Helleniq Renewables, a subsidiary of Helleniq Energy, with two projects of 25 MW each in the municipality of Florina. Greece awards 189 MW of battery storage in third Greece's Regulatory Authority for Energy, Waste, and Water (RAAEY) has published the results of the country's third auction for standalone battery energy storage system. Greece: 27GW of battery storage projects gear up for While the winning projects bid less than EUR60k/MW, most bids sought more than EUR70k with higher prices missing out. While funding was awarded to established Greek companies, notable losers included Eunice and Greece Launches Final Tender for 200 MW Battery Interested developers must submit their bids by December 23, , and complete connection applications by January 31, . Originally aiming for a 300-MW award, this tender follows the success of earlier rounds Greece launches third tender for 200 MW of battery energy The deadline for bid submissions is set for 23 December , with connection applications due by 31 January . The bidding price for projects is capped at 145,000 euros Greece Launches Tender for 200 MW Battery Storage ProjectsGreece launches a 200 MW battery storage tender, bolstering its 1-GW energy program. Bid by December for a chance at substantial subsidies! Greece opens tender for 200 MW of battery storageConnection applications should be filed by January 31, . The maximum allowance bid price is capped at EUR 145,000 per MWh and is open to proposals for Greece Opens Final 200-MW Battery Storage Tender with EUR The auction, officially announced in the Government Gazette, invites bidders to submit proposals by December 23, . Projects must apply for grid connection by January Greece awards 188.9 MW for subsidized battery storage in final Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy
