

Why is battery energy storage important in Vietnam? The Vietnam battery energy storage market has experienced significant growth due to the increasing adoption of renewable energy sources and the need for energy storage solutions. Battery energy storage systems (BESS) are critical for storing and managing electricity generated from renewables. Could Vietnam replace fixed feed-in tariffs with standardized auctions? As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost. Can solar and wind power meet Vietnam's near-term energy needs? Such financial hurdles have challenged the government's ability to use fossil fuels to expand electricity supply in step with Vietnam's fast-growing economy. Contrastingly, solar and wind power's lower capital requirements and faster development timelines are well-suited to meeting Vietnam's near-term energy needs. How can a new LNG-to-power project protect Vietnam from global fuel price volatility? Prioritizing domestic renewables and grid resilience over new LNG-to-power projects can shield Vietnam from global fuel price and exchange rate volatility while still meeting demand growth. Vietnam stands at an inflection point. How much will energy cost by 2025? Cenergy's operations, production and commercialisation of 200 MW in annual battery storage capacity would need US\$10 million to US\$20 million by 2025, said Dung. Does VinFast have a battery manufacturing facility in Vietnam? Even with such advancements, VinFast has constantly sought new funding sources to develop its battery-making capability. Last December, VinFast announced its formal application to the Development Financial Corporation (DFC) for a US\$500 million loan to establish a lithium-ion battery manufacturing facility in Vietnam. As at November 2023, Vietnam had only three pilot BESS projects: one at Power Engineering Consulting Joint Stock Company 2 (PECC2), another at VinFast and a third at Kehua Digital Energy in Khanh Hoa. As at November 2023, Vietnam had only three pilot BESS projects: one at Power Engineering Consulting Joint Stock Company 2 (PECC2), another at VinFast and a third at Kehua Digital Energy in Khanh Hoa. International funding and capital sources for RE and BESS projects in Viet 35 FIGURE 18. Domestic funding and capital sources for RE and BESS projects in Vietnam 36 FIGURE 19. Lithium battery pack and cell prices from 2015 to 2023 50 The German Energy Solutions Initiative of the German Federal Government It can be expected that the demand for project financing, in particular for large cross-border investment projects, will continue to grow in 2024. This report aims to respond to most frequently asked queries that lenders and borrowers raise when considering the use of project financing. Most of the Vietnamese authorities are looking to retroactively revise purchase prices for 173 solar and wind projects, reducing revenues by 25% to 46%, risking bankruptcies across the renewable energy sector, and jeopardizing investor confidence needed to meet the government's targets of 73 gigawatts. Several types of incentives for rooftop solar projects were suggested for MOIT's consideration, including tax reductions and other financial incentives. BESS projects by application Grid scale BESS can be used for frequency regulation, peak shaving (i.e. reducing demand during peak hours to lower prices). The Vietnam Battery Energy Storage Market is projected to witness mixed growth rate patterns during 2024 to 2026. The growth rate starts at 16.23% in 2024 and reaches

20.76% by . By , the Battery Energy Storage market in Vietnam is anticipated to reach a growth rate of 16.90%, as part of an Cenergy's operations, production and commercialisation of 200 MW in annual battery storage capacity would need US\$10 million to US\$20 million by , said Dung. Data from the International Energy Agency showed that transportation currently accounts for about 30 per cent of global energy use Sector Analysis Vietnam As at No-vember , Vietnam had only three pilot BESS projects: one at Power Engineering Consulting Joint Stock Company 2 (PECC2), another at VinFast and a third at Kehua Digital PROJECT FINANCE GUIDE: VIETNAM It can be expected that the demand for project financing, in particular for large cross-border investment projects, will continue to grow in . This report aims to respond to most From boom to balance in Vietnam's clean energy As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost. Development of Battery Energy Storage Systems in VietnamOne of the key highlights of Vietnam's revised Power Development Plan VIII (PDP8) is the significant increase in the targets for Battery Energy Storage Systems (BESS). Vietnam Battery Energy Storage Market (-) The Vietnam battery energy storage market focuses on energy storage systems that use batteries to store electrical energy for various applications, including renewable energy integration and grid stabilization. As Vietnam embarks on renewables push, battery Many startups are counting on home-grown battery technologies to harness Vietnam's abundant renewable energy resources as they hold out for more robust incentives. Pioneering Innovation with Vietnam's BESS Pilot ProjectThe project's financing model combines diverse sources--equity from EVN, non-sovereign or sovereign loans from the ADB and others, grants from JETP, and contributions from philanthropic partnerships. Vietnam Battery Energy Storage Systems Market ReportAs Vietnam continues its ambitious energy transition, the deployment of advanced battery storage technologies, including lithium-ion, flow, lead-acid, and nickel-based systems, has become
