

wholesale containerized BESS price list in Finland

How does Bess make money in Finland? Today, BESS's most significant revenue sources in Finland are frequency containment reserves (FCR-N, FCR-D up, and FCR-D down). Prices of FCR-N and FCR-D up have continuously increased for the past few years. Fingrid procures these reserves based on competitive bidding from the yearly and hourly markets. What makes Bess a good investment in Finland? BESS's most significant revenue sources in Finland are frequency containment reserves. Spot prices have been highly volatile, making the market favorable for BESS. Continuous, fast-paced trading of energy. Supports the balancing of the power system and brings extra earning opportunities for batteries. How does Bess work? BESS owners can participate in the Nordic wholesale electricity market, operating on a joint Nordic power exchange called Nord Pool. BESS operators can also participate in cross-border markets to provide storage capacity for ancillary services, such as frequency regulation, which helps maintain grid stability and reliability. How many Bess projects are planned in ? For example, Finnish investment company Exilion achieved 40,700 EUR/MW/month in the second half of . In , 113 MW BESS projects are expected to become operational, and 359 MW industrial-scale BESS projects have already been announced for the next five years (Elinkeinoelämän Keskusliitto,).
